The Simplicity Garden

A clean-cut, modern silhouette can make a statement. Using a singular palette of intense rose, blooms are block planted demonstrating an inner confidence for colour and structured design. Minimalism here, offers a fuss-free, hot edged, polished finish.

Closely related the gardening profile of the 'Al Fresco Aspirations' segment, this gardener typically has a small garden, patio or balcony, or no garden at all. With little interest of gardening as a hobby, the minimalist's garden is heavily influenced by architecture and interior design, as well as landscape. There is a strong emphasis on clean lines, plant and structural form with a sense of place.
