Aster Alpha

Highlights…

The **NEW Spring Break**® mixes are real eye-catching planting combinations, perfect for February to March sales in 1.5-2 litre pots, bowls, planted containers or hanging baskets and provide exceptionally long shelf life at retail!

Watch Andy Ward demonstrate the benefits of Spring Break HERE

Aster Alpha® is the quickest and easiest Aster to grow on the market today, requiring no growth

regulators, blackouts or pinching. Ideal for multiple pot sizes up to 3 litres in as little as 8-10 weeks, a perfect follow-on retail crop just as the colour sales opportunities for summer annuals begins to fade. Ideal for use in planting combos with **Trailing Pansy Cool Wave®**

The ultra-hardy **Primula Obsidian** with its striking dark foliage will be an instant hit with consumers for impulse flowering pot sales in late January to mid-February. Bump 3 plants into a large pot and sell alongside spring flowering Perennials.

Easy to programme our sweetly scented **Dianthus Dart** can be finished in as little as 6 weeks for an autumn 1-2 litre pot programme or overwinter for early spring colour sales.

Primrose Obsidian

QUICK & EASY Ordering...

We recommend ordering early to secure your plant requirements for 2025, as many new introductions and novelties sell out very quickly.

For quick and easy ordering visit **WebTrack®** . Our online ordering website provides you with ‘live’ product availability 24/7, instantaneous confirmations along with product information and variety images.
